

STORAGE SPACE HEATING PROGRAM DESCRIPTION

(Currently not available to former Alliant members)

Storage space heating installations are governed by the following terms and conditions:

1. At the site location described below, Member, at his expense, shall install storage space heating system (system), as approved by Nobles Cooperative Electric (NCE), with electricity as the primary heating source. NCE, at its expense, shall supply the load management control device (radio receiver), meter and meter socket, which shall be and shall remain the property of NCE.
2. Control shall be mounted on the exterior of the structure in accordance with NCE specifications.
3. Member is responsible for all costs if any additions/modifications to existing wiring to serve the storage space heating system.
4. Electric energy used by the off-peak load shall be sub-metered.
5. NCE shall extend to Member a special discount allowance, as per Rate Schedule 11, from the regular applicable rate schedules adopted by NCE from time to time. Such discount is currently 1.4 cents, as per Rate Schedule 11, for all kilowatt-hours of electricity consumed through the off-peak meter. This rate may be changed by actions of the NCE Board of Directors.
6. NCE reserves the right to control off-peak loads as needed to promote efficient operation on NCE system.
7. Storage space heating loads may be controlled up to a maximum of 500 hours per heating season.
8. Off-peak wiring enclosures will be sealed by NCE. Member will have access to circuit breakers and fuses. If any evidence of tampering exists, this agreement is void and no further discount will be applied. The member will be billed for all savings for the month immediately preceding the discovery of such tampering and all further usage will be billed at the General Service Rate.
9. NCE reserves the right to inspect the off-peak equipment and wiring. The cooperative shall give notice and perform the inspection during normal business hours.
10. Member agrees to hold NCE harmless and shall indemnify NCE from all claims, expenses, and legal fees resulting from control malfunction, unsatisfactory operation, prolonged control, or damage resulting from the member's use of this system.
11. Member shall not tamper with, alter, or modify the subject load management control device and equipment so as to circumvent its operation, nor shall Member install or add any electrical powered devices to consume electricity through The System without first obtaining the express, written consent of NCE.
12. Member shall install and maintain such insulation and other weatherization materials as

are necessary to meet minimum standards adopted by NCE.

13. Qualifying loads are central off-peak storage furnace, room storage, slab storage heaters, combination storage, and heat pump slab storage.
14. The member or NCE may terminate this agreement by providing the other party with ninety days written notice.
